Prompt Gambar Susun Gambar Baru dan Latar Cerita Wilayah

Judul penelitian: *Pengembangan Game Edukasi Etnopedagogi Kedu Berbasis Analitik sebagai Model Asesmen Literasi Digital Peserta Didik Sekolah Dasar*

Per 4 November 2026 · Lampiran 08 (Susun Gambar selama studi) dan 12 (naskah cerita) · Status: `draf pengembang`, `asal: pengembang` (disusun AI atas permintaan pengembang)

Dokumen ini berisi prompt siap tempel ke ChatGPT untuk dua gambar Susun Gambar baru yang masih ditunggu 08 (Wayang Kedu dan pengganti Candi Pawon) dan untuk semua latar slide cerita wilayah: Kenali (`region_intro`), dialog masuk wilayah (`level_open`), wilayah tuntas (`level_done`), dan cerita penghubung tantangan kelima (`scenario_open`). Isinya mengikuti naskah 12, bukan naskah yang terpasang sekarang, karena naskah 12 yang dipakai selama studi. Polanya sama dengan 32A dan panduan gambar puzzle Katalog Aset (`gelita-katalog/update/gambar-puzzle/panduan-gambar-puzzle-gelita.md`).

Ringkasan

- **Susun Gambar:** 2 prompt. `TMG-P11` Wayang Kedu (`challenge.item.tmg-1-k01`, 3 × 3) dan `MGL-P05R` Candi Pawon pengganti (`challenge.item.mgl-1-e01`, 4 × 4, kode slot tetap). Keterangan keduanya tidak berubah dari 08.
- **Latar cerita wilayah:** 29 gambar untuk 92 slot. Satu gambar dipakai untuk beberapa slide yang tempatnya sama; tokoh Jaka dan Mbah Kedu ditampilkan game di atas latar, jadi latar tidak memuat tokoh.
- **Belum termasuk:** latar `intro`, `ending`, dan Peta Kedu (sudah ada di katalog), serta gambar situasi Skenario Digital (32A; 24 gambar sudah ada di `gambar/32a/`).

Cara memakai

1. Buka percakapan baru di ChatGPT untuk setiap gambar. Lampirkan gambar acuan gaya `reference.06` atau `reference.07` dari `gelita-katalog/assets/referensi/` (pemandangan dengan hasil akhir GELITA). Untuk Susun Gambar dan gambar bertanda *foto acuan*, lampirkan juga foto berlisensi objeknya.
2. Tempel prompt di kotak kode apa adanya. Jangan menambah tokoh, tulisan, atau benda yang tidak disebut prompt.
3. Periksa hasilnya dengan daftar periksa. Kalau gagal, minta perbaikan di percakapan yang sama dengan menyebut butir yang gagal.
4. Simpan sebagai WebP dengan nama kode aset. Gambar latar cerita yang dipakai beberapa slide disimpan sekali per kode slot di tabelnya (salinan berkas yang sama).
5. Tim Katalog Aset menambahkan entri di `gelita-katalog/data.json` (kode, berkas di `assets/latar/` atau `assets/tantangan/`, ukuran) dan menjalankan `node build.mjs`, sesuai `gelita-katalog/AGENTS.md`. Pemasangan ke game memakai `php spark gelita:katalog:impor`, tidak pernah di server produksi tanpa izin pengembang.

Catatan pemasangan:

- Slot `bg.cerita-tuntas-{wilayah}-05` dan semua `bg.cerita-layar-*` baru punya slide setelah naskah 12 dipasang (tahap 3, 12 → Yang perlu disiapkan di tahap 3 no. 1 dan 3). Sampai saat itu impor katalog melewati gambar untuk slide yang belum ada. Awalan `bg.cerita-layar-` belum dikenali `CatalogImporter`; itu dikerjakan bersama konteks `scenario_open` di bagian 6 (32).
- Catatan gambar (`note`) Candi Pawon di berkas data bank soal masih menyebut "stupa kecil di atap". Catatan itu diganti arahan baru saat gambar pengganti dipasang (berkas data, lalu `build-workbook.php`).

Aturan bersama

Untuk semua gambar

- Gaya: blok `GELITA ACTIVE VISUAL DIRECTION — 2026-10-11` dari katalog, kata per kata.
- Tanpa tulisan, angka, logo, atau tampilan aplikasi yang bisa dibaca. Papan, layar, ponsel, dan tablet tampil kosong, buram, atau berkabut.
- Orang Jawa berpakaian sopan, tidak menatap kamera, bukan tokoh nyata. Anak-anak selalu dekat orang dewasa dan tidak melakukan hal berbahaya.

Untuk latar cerita

- **Tanpa Jaka dan Mbah Kedu.** Game menampilkan potret tokoh di atas latar.
- **Komposisi slide:** 16:9, 1920 × 1080; sepertiga bawah tenang dan agak gelap untuk panel teks; 8% atas tanpa detail penting; tetap terbaca di bawah lapisan navy 35–75% (sama dengan latar `intro`).
- **Kabut Lupa** selalu berwarna biru kelabu yang sama (#8C97AA–#5B6478), berlapis lembut, tidak pernah membentuk huruf, menyeramkan tetapi tidak menakutkan.
- **Tidak membocorkan butir.** Gambar hanya memuat yang disebut kalimat slidenya. Dialog masuk dan cerita penghubung diputar tepat sebelum tantangan, jadi latarnya tidak menampilkan benda, tanda bahaya, atau isi layar yang diuji butir (sama dengan aturan menulis cerita di 12). Kenali boleh memuat fakta budaya, karena selama studi Kenali baru terbuka setelah wilayahnya tuntas.
- **Wonosobo:** kabar berantai di naskah 12 adalah ramalan gempa. Latar tidak menampilkan kawah, asap, retakan, atau bangunan runtuh, supaya tidak menambah rasa takut dan tidak mengulang `wnb-3-b`.

Untuk Susun Gambar

- Satu pemandangan utuh tanpa kolase; setiap area kisi punya penanda yang berbeda; tanpa bidang polos; pagi atau siang, bukan malam (panduan gambar puzzle §2–§3).
- Lulus uji keping otomatis dan uji susun oleh dua orang, lalu dicek ulang terhadap butir 08 (08 → keputusan Susun Gambar).

in finish and mood; keep the exact subject specified. No painted brush or paper texture.
Puzzle adaptation of the GELITA direction: a clear morning or warm golden-hour daytime scene (never night). Brass gold lives in the sunlight and highlights; deep navy appears only in small shadow accents and distant mountain shade, never as a large dark sky. Rich, organised detail across the whole square — not clutter. Real places, buildings, costumes and objects keep their true shapes and proportions; only the rendering is stylized.
Characters: do NOT include Jaka or Mbah Kedu — this is a scene asset. Attached GELITA references are for render finish and mood only; never copy their characters, text or logo into the picture.

SUBJECT AND COMPOSITION
A shadow-puppet (wayang kulit) performance in the open pendapa (pillared pavilion) of a Temanggung village, in warm late-afternoon light before the show (daylight, not night). A large white cloth screen (kelir) stretched in a wooden frame across the middle; an adult dalang (puppeteer) in a batik headcloth sits behind it, holding a carved, painted leather puppet in the Kedu style; a brass oil lamp (blencong) hangs above him; puppet shadows fall on the kelir; banana-trunk stems hold rows of puppets on both sides; gamelan players with bronze gongs and kettle gongs sit behind; village children sit cross-legged on mats in front, with adults among them.

Puzzle layout — imagine the square divided into a 3×3 grid (do NOT draw the grid). Put one clear landmark in each area:
• Row 1 (top) — (1) the carved roof beams of the pendapa with the hanging brass blencong lamp; (2) the top of the kelir with a puppet shadow; (3) a row of standing puppets on a banana trunk, right side.
• Row 2 — (4) gamelan gongs hanging in their carved frame; (5) the dalang behind the kelir holding a puppet; (6) kettle gongs (bonang) with a player.
• Row 3 (bottom) — (7) children sitting on a woven mat, seen from behind and the side; (8) the base of the kelir with the long banana trunk; (9) an adult with a child on her lap and a bamboo tray of snacks.

Accuracy — Keep the puppets in the Kedu style shown in the reference (do not copy Balinese or Javanese court-style faces); the kelir is plain white cloth; the dalang is an adult man; no mountains, coffee plantations, temples, kuda kepang, fish, or writing anywhere.
Use a verified licensed photograph wherever possible. If illustrating, attach a verified photo and faithfully preserve real architecture, costume, anatomy and proportions. Never invent historical detail. Use the photo only as a factual reference; compose a new picture as described here, do not copy the photo.
Place — Temanggung Regency, Central Java, Indonesia — cool tropical highland between the twin volcanoes Mount Sindoro and Mount Sumbing; dark, fertile volcanic soil; terraced vegetable and coffee fields; bamboo groves, banana plants, tall sengon trees and ferns; Javanese village houses with red clay-tile roofs and plastered walls. Do NOT show tobacco plants, cigarettes or smoking. A bright, clear morning or warm late-afternoon light from the left.
Level — EASY (3×3 grid): bold, simple shapes, strong colour and brightness contrast, one clear main subject.
People — Stylized like the GELITA references but anatomically correct: Javanese Indonesians of mixed ages in modest local clothing, calm and friendly, never looking at the camera; no real or famous person; no brand logos; children only with adults and only doing safe things.
Compose distinctive features across the whole square for puzzle tiles.

DELIVERY
Target canvas 1200 × 1200 pixels; aspect 1:1 (generate at the highest square resolution available; it will be resized to exactly 1200 × 1200). Complete subject within canvas, proportional scaling only. Opaque, full-bleed background matching the scene brief. Deliver WebP for raster assets, named challenge.item.tmg-1-k01.webp.

CONSTRAINTS
No watermarks, signatures, unintended text, extra limbs, duplicate subjects, cropped key features, blurry edges, neon colours, clutter, or fake checkerboard transparency. No painterly 2D, gouache, paper grain, or conflicting Jaka costume.
Puzzle safety — This image will be cut into a 3×3 tile-swap puzzle for children:
• ONE continuous natural scene — no collage, no panels, no grid lines.
• Full-bleed to every edge; NO plain, white, transparent, studio or empty background.
• All 9 areas have different landmarks; no two areas look alike.
• No large uniform patches: sky, water, walls, mist and ground carry clouds, ripples, texture, objects or changing light.

```
• Deep focus everywhere: no bokeh, blur, vignette, dark corners or lens flare.
• Asymmetric; light from one side; the horizon rises and falls naturally, never one straight line
across.
• Faces and statues sit fully inside one area, away from the grid lines.
• No text, letters, numbers, logos, watermarks, frames or borders.
Avoid — night sky, fire, smoke, text.

proportions; only the rendering is stylized.
Characters: do NOT include Jaka or Mbah Kedu — this is a scene asset. Attached GELITA references
are for render finish and mood only; never copy their characters, text or logo into the picture.

SUBJECT AND COMPOSITION
A close, slightly low view of Candi Pawon, a small Buddhist temple of grey andesite on a raised
base, in a neat village garden on a clear morning. The picture is filled by the stairway, the
doorway with its carved frame and the carved wall panels (bodhisattva, kalpataru tree and kinnara
reliefs, faithful to the real temple); the roof and its small crowning stupas are cut off by the
top edge of the picture or only barely visible far behind leaves. Around the base: a garden path,
flowers, a frangipani tree, a low stone wall; a red-roofed village house at one side.

Puzzle layout — imagine the square divided into a 4×4 grid (do NOT draw the grid). Put one clear
landmark in each area:
• Row 1 (top) — (1) frangipani branches in bloom against the sky; (2) the upper wall with a carved
kalpataru panel (no roof, no stupa); (3) the carved lintel above the doorway; (4) a red-roofed
village house with a window.
• Row 2 — (5) a coconut palm trunk and a banana plant; (6) a carved wall panel with a standing
figure; (7) the dark doorway with its carved frame; (8) a carved corner of the temple wall with
moss.
• Row 3 — (9) a low stone garden wall with a potted plant; (10) the left side of the stairway with
carved side wings; (11) the right side of the stairway with steps; (12) the temple base with a row
of carved panels.
• Row 4 (bottom) — (13) a garden path of stepping stones; (14) a flower bed with red canna and
marigolds; (15) neat grass with a garden tap and a bucket; (16) a bicycle leaning against the
garden wall.

Accuracy — A small Buddhist temple, smaller than Mendut. No hollow (latticed) stupas, no Borobudur,
```

```
no large stupa shapes anywhere in the picture. No Hindu elements.
Use a verified licensed photograph wherever possible. If illustrating, attach a verified photo and faithfully preserve real architecture, costume, anatomy and proportions. Never invent historical detail. Use the photo only as a factual reference; compose a new picture as described here, do not copy the photo.
Place — Magelang, Central Java, Indonesia — the green Kedu plain around Borobudur; Mount Merapi and Mount Merbabu on the eastern horizon, the long Menoreh Hills to the south; rice paddies, coconut palms, banana and kapok trees; grey-black andesite temple stone with patches of lichen and moss; red-tiled village roofs. Warm golden morning light from the left.
Level — MEDIUM (4×4 grid): richer detail, medium contrast, sixteen clearly different areas.
People — Stylized like the GELITA references but anatomically correct: Javanese Indonesians of mixed ages in modest local clothing, calm and friendly, never looking at the camera; no real or famous person; no brand logos; children only with adults and only doing safe things.

SUBJECT AND COMPOSITION
wide 16:9 cinematic composition, main subject inside the central 75% of the width and the central
80% of the height, lower third calm and slightly darker for text panels, top 8% free of important
detail, mid-tone exposure that stays readable under a dark navy overlay of 35% at the top to 75% at
the bottom, no people in the foreground. A clear early morning over Temanggung: Mount Sindoro and
Mount Sumbing stand side by side like an elder and younger sibling, their peaks sharp against a
pale gold sky; on the lower slope of Sindoro a small, clear spring pool surrounded by old trees and
ferns, its water flowing into a stream; terraced fields in between, warm sunlight from the left.
Place — Temanggung Regency, Central Java, Indonesia — cool tropical highland between the twin
volcanoes Mount Sindoro and Mount Sumbing; dark, fertile volcanic soil; terraced vegetable and
coffee fields; bamboo groves, banana plants, tall sengon trees and ferns; Javanese village houses

volcanoes Mount Sindoro and Mount Sumbing; dark, fertile volcanic soil; terraced vegetable and
coffee fields; bamboo groves, banana plants, tall sengon trees and ferns; Javanese village houses
with red clay-tile roofs and plastered walls. Do NOT show tobacco plants, cigarettes or smoking.
People — Stylized like the GELITA references but anatomically correct: Javanese Indonesians of
mixed ages in modest local clothing, calm and friendly, never looking at the camera; no real or
famous person; no brand logos; children only with adults and only doing safe things.
Story safety — show only what this brief names. Every sign, board, banner, page, phone, tablet or
screen carries no readable letters, numbers, icons or app layout: blank boards, soft blurred shapes
or a faint mist only. Nothing frightening: no disaster, smoke plume, eruption, cracked ground,
injury or crying.

DELIVERY
Target canvas 1920 × 1080 pixels; aspect 16:9. Complete subject within canvas, proportional scaling
only. Opaque background matching the scene brief. Deliver WebP for raster assets, named bg.cerita-

Asset: bg.cerita-kenal-temanggung-03
Premium stylized 3D animated adventure game for Indonesian children aged 8–14. Softly rounded dimensional forms, warm cinematic light, brass gold (#DFC087, #F0DFB8), deep navy (#0B1320, #1B2740), restrained turquoise, earthy browns and cream. Match GELITA reference.01 and reference.09 in finish and mood; keep the exact subject specified. No painted brush or paper texture.
Characters: do NOT draw Jaka, Mbah Kedu or any narrator — the game places them over this background. Attached GELITA references are for render finish and mood only; never copy their characters, text or logo into the picture.

SUBJECT AND COMPOSITION
wide 16:9 cinematic composition, main subject inside the central 75% of the width and the central 80% of the height, lower third calm and slightly darker for text panels, top 8% free of important detail, mid-tone exposure that stays readable under a dark navy overlay of 35% at the top to 75% at the bottom, no people in the foreground. An archaeological site on the slope of Mount Sindoro: ancient stone house foundations, terraces and a small stone stairway partly uncovered from layers of grey volcanic sand and gravel, with a few archaeologists working calmly with brushes; a small, plain Hindu temple of grey stone far in the background; soft afternoon light, sense of time and care.
Place — Temanggung Regency, Central Java, Indonesia — cool tropical highland between the twin volcanoes Mount Sindoro and Mount Sumbing; dark, fertile volcanic soil; terraced vegetable and coffee fields; bamboo groves, banana plants, tall sengon trees and ferns; Javanese village houses with red clay-tile roofs and plastered walls. Do NOT show tobacco plants, cigarettes or smoking.

GELITA ACTIVE VISUAL DIRECTION — 2026-10-11
Asset: bg.cerita-kenal-wonosobo-04
Premium stylized 3D animated adventure game for Indonesian children aged 8–14. Softly rounded
dimensional forms, warm cinematic light, brass gold (#DFC087, #F0DFB8), deep navy (#0B1320,
#1B2740), restrained turquoise, earthy browns and cream. Match GELITA reference.01 and reference.09
in finish and mood; keep the exact subject specified. No painted brush or paper texture.
Characters: do NOT draw Jaka, Mbah Kedu or any narrator — the game places them over this
background. Attached GELITA references are for render finish and mood only; never copy their
characters, text or logo into the picture.

SUBJECT AND COMPOSITION
wide 16:9 cinematic composition, main subject inside the central 75% of the width and the central
80% of the height, lower third calm and slightly darker for text panels, top 8% free of important
detail, mid-tone exposure that stays readable under a dark navy overlay of 35% at the top to 75% at
the bottom, no people in the foreground. A village pavilion (pendapa) performance: a Topeng Lengger
dancer in a carved wooden mask and traditional costume, a musician playing a bundengan (a large
curved woven-bamboo duck-herder's hood fitted with strings), a small audience; at the edges of the
picture the Mist of Forgetting: cold desaturated blue-grey mist (#8C97AA to #5B6478) drifting in
soft layered bands, faint abstract wisps that never form readable letters, eerie but never scary is
thicker than anywhere else.
Place — Wonosobo and the Dieng Plateau, Central Java, Indonesia — cool highland at about 2,000 m;
steep terraced potato and cabbage fields, cypress (cemara) and pine trees, carica (mountain papaya)
trees; houses with zinc or clay-tile roofs; people in thick jackets, knitted beanies and sarongs

over their shoulders.
People — Stylized like the GELITA references but anatomically correct: Javanese Indonesians of
mixed ages in modest local clothing, calm and friendly, never looking at the camera; no real or
famous person; no brand logos; children only with adults and only doing safe things.
Story safety — show only what this brief names. Every sign, board, banner, page, phone, tablet or
screen carries no readable letters, numbers, icons or app layout: blank boards, soft blurred shapes
or a faint mist only. Nothing frightening: no disaster, smoke plume, eruption, cracked ground,
injury or crying.
