Draf Terjemahan Bahasa Inggris Bank Soal Baru

Per 3 November 2026 · Bagian dari revisi 10 analitik · Sumber: 08_DRAF_BANK_SOAL.md (per 26 Oktober 2026, dengan perbaikan cek fakta 27 Oktober 2026 dari 25) · Status: `draf pengembang` (didraf AI, menunggu pemeriksaan pengembang) · Semua butir tetap `needs_verification`

Dokumen ini berisi pasangan bahasa Inggris untuk setiap teks bank soal baru yang tampil di game: instruksi, bacaan, pernyataan, petunjuk, bagian unggahan, dan seluruh teks Skenario Digital. Dasarnya keputusan pengembang 2 November 2026 (04; 31 → Keputusan pengembang no. 8 dan 11): **AI mendraf terjemahan sekarang, pengembang memeriksanya, lalu butir yang direvisi dari validasi diterjemahkan ulang.**

Bahasa Inggris tidak dipakai validator. Validasi ahli, uji keterbacaan, dan cek fakta tetap memakai teks Indonesia di 08. Kalau 08 berubah, baris yang sama di sini ikut diterjemahkan ulang (lihat Cara memperbarui).

Cara membaca

- Urutan dan judul bagian sama dengan 08, jadi setiap butir dicari dengan kodenya (`wnb-3-a04`) di kedua dokumen. Teks Indonesia **tidak diulang** di sini; bandingkan dengan 08.
- Kunci, skor, kode kesalahan, kode alasan, Bloom, sub-aspek, dan level AKM **tidak berubah** dan tidak ditulis ulang, kecuali kunci Isi Rumpang (kata bahasa Inggrisnya perlu ditetapkan).
- Kunci Benar atau Salah (benar/salah) dan kunci bagian ketuk *Periksa Unggahan* (A2, C10, dan seterusnya) sama persis dengan 08.
- Butir babak 1 Cari Objek (`*-4-x01`–`x04`, PBK) memakai terjemahan bank lama di `docs/bank-soal/data/*.php`. Dua butir yang isinya diubah cek fakta 27 Oktober 2026 diterjemahkan ulang dan ditandai.
- Kartu misi dan instruksi Skenario Digital sudah punya pasangan bahasa Inggris di 12 → Kartu misi; di sini hanya dikutip supaya lengkap.
- Panjang kata bahasa Inggris dihitung kasar (± 5 kata), sama seperti 08.

Aturan penerjemahan

1. **Ejaan Inggris Britania**, seperti bank lama dan berkas bahasa: *colour*, *metres*, *honoured*, *organiser*, *Mum*, *Dad*.
2. **Nama diri tetap**: nama orang, desa, kecamatan, candi, sanggar, warung, dan rumah gerabah fiktif, aplikasi *Kedugram*, nama akun (`@jalan2_bima`), dan alamat `.example` (termasuk jalurnya, misalnya `/masuk`). Sapaan di depan nama tetap, seperti di bank lama (*Pak Darto*): *Bu Sari*, *Pak Anton*, *Kak Dewi*, *Kak Laras*. Sapaan "Kak" tanpa nama di komentar (cara menyapa pengunggah) dibuang, karena tidak punya padanan.

3. **Istilah budaya tetap dalam bahasa Indonesia atau Jawa**, dengan penjelasan yang sama seperti di teks Indonesia: *kuda lumping*, *kuluk*, *stupa*, *getuk*, *kendil*, *bundengan*, *kowangan*, *embun upas*, *carica*. *Waisak* menjadi *Vesak*, *Masehi* menjadi *CE*, *Kartu Keluarga* menjadi *Family Card*.
4. **Kata ganti netral.** Teks Indonesia memakai "ia" dan "-nya" yang tidak menyebut jenis kelamin. Terjemahan menghindari *he*/*she* untuk tokoh yang tidak disebut jenis kelaminnya; nama tokoh diulang atau dipakai *they*. Kalimat jadi sedikit berulang, tetapi tidak menambah informasi yang tidak ada di teks asli. *Mum*/*Dad* dipakai karena teks asli menyebut ibu atau ayah.
5. **Angka dan jam** mengikuti format Inggris: *3,150 metres*, *2,672*, *Rp50,000*, *07:30*.
6. **Huruf besar dan simbol** dari teks Indonesia dipertahankan: *TRUE*/*FALSE* di instruksi (tombolnya *True*/*False*, `Game.verdictBenar`/`verdictSalah`), huruf kapital di komentar kasar (*WRONG!*, *NONSENSE!*), emoji, ✓, 💬, 📢, 🔍.
7. **Bahasa gaul komentar** diganti padanan yang sama ringannya: "Wkwk" → *LOL*, "nggak zaman" → *so uncool*, "jadul" → *old-fashioned*. Kata kasar tidak ditambah dan tidak dikurangi.
8. **Isi Rumpang**: setiap kata di bank kata punya tepat satu pasangan bahasa Inggris, dan tidak ada dua kata bahasa Inggris yang sama dalam satu variasi. `ErrorCodeResolver` memetakan kata Inggris ke kata Indonesia lewat pasangan ini untuk mencari kode kesalahan (31 §10.2). Kalimat di sekitar rumpang ditulis supaya (a) kunci masuk secara tata bahasa, (b) pengecoh tetap menggoda dengan alasan yang sama seperti di 08, dan (c) tidak ada *a*/*an* sebelum rumpang yang membocorkan bunyi awal kunci.
9. **Skenario Digital**: umpan balik tidak memakai *wrong* atau *failed*; penjelasan setelah kesempatan habis juga tidak memakai *right*, *correct*, atau *wrong* (padanan aturan di 08 → *Cara membaca*). "Tepat." diterjemahkan *Good choice.*, "Pilihan yang aman." *A safe choice.*, "bagus" *well done*. Alasan ditulis sebagai kalimat utuh, sama seperti di teks Indonesia; kalimat tanya alasannya tetap `Js.scenarioReasonQuestion` (*The most important thing I'm thinking about here is …*, dari 32 §13).
10. **Bahasa anak**: kalimat pendek, kata sehari-hari, *you*/*your* untuk "kamu"/"-mu", seperti teks Indonesia untuk siswa kelas 5.

Variasi a: *Two Mountains of Temanggung*

> Temanggung Regency in Central Java lies between two volcanoes, Mount Sindoro and Mount Sumbing. People call them the twin mountains because they look alike. Mount Sindoro is about 3,150 metres high, while Mount **(1)** is about 3,370 metres high. Long ago, both mountains erupted and spread **(2)**. The ash made the soil on their slopes fertile. In this **(3)** soil, farmers grow arabica coffee. The coffee grows at a height of more than 900 metres. So the coffee gardens are in a **(4)** place.

Action	Feedback
Fill in everything so the quiz result comes out fast	Dates of birth and mothers' names are often used to open accounts. That data could be misused.
Fill in only your date of birth and leave the rest empty	Your date of birth is personal data too. A quiz for fun doesn't need data like that.
Stop, then ask your parents whether it's safe	Good choice. A quiz that asks for personal data should make us suspicious, and your parents can help check it.
Stop playing without telling anyone	Your data is safe. Telling your parents would help if the app shows up again.

Explanation after tries run out: This quiz asks for your date of birth and your mum's full name, even though a quiz does not need that data. By stopping and asking your parents, your data stays safe.

Send a photo of the Family Card so you can join	A Family Card holds data about your whole family. A real prize draw does not ask for it.
Send your parent's phone number first, and the Family Card photo later	Your parent's phone number is also personal data that can be used to trick people.
Show your parents, and warn Sinta too	Good choice. Your data is safe, and you help Sinta too.
Don't join, and don't talk about it with Sinta	Your data is safe. Sinta may need help, because Sinta has already sent the data.

Explanation after tries run out: A Family Card and your parent's phone number are your family's personal data, even if your friend says it's safe. By showing your parents and warning Sinta, you keep your data safe and help your friend.

wnb-5-b02 · Password. You get a message from "School Admin": "Your learning account will be blocked. Sign in again at `sekolah-kita.example/masuk` and type your password." You notice the address is different from the school website you usually use.

Action	Feedback
Open the link and type your password there	A different address is a warning sign. A fake website can steal your password.
Reply to ask whether it's really the school admin	A fake sender will say "yes". It's safer to ask your teacher directly.
Show the message to your teacher without opening it	Good choice. Your teacher can make sure, and other friends can be warned.
Delete the message and don't tell anyone	Your password is safe. Telling your teacher would protect your friends too.

Explanation after tries run out: The website address is different from the usual school website, so the message may not be from the school. By showing the message to your teacher without opening it, your password stays safe and your teacher can check.

Reason	Kode
The address is different, so it could be a fake website	R-RISK

wnb-5-b03 · Permission to share a friend's photo. On a school trip to Dieng, you take a photo of Nadia asleep on the bus with mouth wide open. Friends in the class group find out and write: "Send us the photo, it must be funny!"

Action	Feedback
Send the photo to the group because your friends asked	Nadia doesn't know about the photo. It may only be shared if Nadia agrees.
Turn it into a funny sticker, then send it to the group	A sticker made from a photo of someone asleep can embarrass them and keep going round.
Say in the group that you need Nadia's permission first	Good choice. You protect Nadia's feelings even when your friends push you.
Don't answer the group, and keep the photo	The photo didn't spread, well done. Explaining your reason could make other friends think too.

Explanation after tries run out: Nadia doesn't know about the photo and might be embarrassed if it spreads. By saying in the group that you need Nadia's permission first, you protect Nadia's feelings even when your friends push you.

wnb-5-b04 · False news, two steps. A video in the class group is titled "Embun upas can make people sick, don't go outside early in the morning!" The video doesn't give a source. Your friend Fikri replies: "I've already sent it to my family group."

Action	Feedback
Send it to other groups too, so people are careful	A video with no source isn't always true. Spreading it can make lots of people worried.
Reply in the group: "Fikri, you're stupid, that's not even a thing!"	Reminding someone is good, but rude words embarrass Fikri.
Politely remind Fikri to check the source	Good choice. The news gets checked first, and Fikri is still respected.
Don't send it and don't respond at all	You didn't help spread it, well done. Telling someone politely can stop the news.

Explanation after tries run out: A video with no source isn't always true, and it has started to spread. By politely reminding Fikri to check the source, the news can be checked before it spreads further.

Catatan untuk diperiksa pengembang

Pilihan penerjemahan yang mengubah sedikit cara butir bekerja, atau yang punya pilihan lain. Semua masih usulan AI.

1. `tmg-2-b` **(Isi Rumpang):** ***dry* dan *dry up* ada di bank kata yang sama.** "Kemarau" paling wajar diterjemahkan *dry (season)*, dan "kering" untuk mata air *dry up*. Keduanya berbeda sebagai teks, jadi pemetaan kode tetap jalan, tetapi dua kata yang mirip bisa sedikit membantu siswa: *dry up* hanya cocok di rumpang (4). Di teks Indonesia "tidak pernah kering" dan kunci (4) "kering" juga sama-sama tersurat, jadi gema katanya setara. Pilihan lain: kunci (4) *disappear*, yang menjauh dari makna "kering".
2. `mgl-2-b` **(Isi Rumpang): pengecoh *diam* → *stop*.** Di teks Indonesia "diam" menyasar rumpang (2) dan, menurut catatan 08, juga bersaing secara bentuk kata di rumpang (5) ("tetap diam"). Dalam bahasa Inggris kata kerja *stop* cocok di (2) ("the bells stop"), tetapi tidak di (5) ("stays stop"). Di (5) yang masih bersaing *together* ("stays together"). Kode sasaran (INF-HUB di rumpang 2) tidak berubah. Pilihan lain: rumpang (2) dijadikan kata sifat ("the bells sound *loud*", pengecoh *quiet*), supaya *quiet* juga bersaing di (5); maknanya sedikit bergeser dari "berbunyi".
3. `wnb-2-a` **(Isi Rumpang): kunci (4) dan (5) menjadi keterangan *well* / *poorly*.** "Dapat" dan "sulit" tidak bisa masuk ke satu kerangka kalimat Inggris yang sama tanpa *to*. Dengan *grows well* / *grows poorly* keduanya bersaing satu sama lain di (4) dan (5), seperti "dapat" dan "sulit" di teks Indonesia. Kalimat sumber diubah dari "tumbuh baik … sulit tumbuh" menjadi *grows best … struggles to grow*, supaya tidak ada kunci yang tersurat. Akibatnya (5) sedikit lebih sulit daripada teks Indonesia, karena di sana "sulit tumbuh" tersurat.
4. `wnb-2-a`**: pasangan *so* / *so that*.** Padanan "sehingga" (akibat) dan "agar" (tujuan) yang menjadi inti pengecoh. Kode khusus *so that* di rumpang (2) dan (3) tetap INF-HUB.
5. **Kata ganti tokoh.** Mengikuti aturan no. 4, nama tokoh diulang (Laras, Arif, Dimas, Sekar, Bima, Sinta, Nadia, Fikri, Raka, Dito), jadi beberapa kalimat terasa berulang. Bila pengembang lebih suka *he*/*she* sesuai nama, cukup diganti di berkas data; butirnya tidak berubah.
6. **Sapaan "Kak" tanpa nama** di komentar Salsa, Tegar, Wulan, dan Dewi dibuang. Di depan nama (Kak Dewi, Kak Laras) tetap, seperti bank lama.
7. **Kata kasar** "bodoh" (`wnb-5-a04`, `wnb-5-b04`) menjadi *stupid*, sama kerasnya dengan teks Indonesia, karena butir itu justru menguji tindakan kasar.
8. **Panjang teks.** Teks bahasa Inggris rata-rata 5–15% lebih panjang. Kotak bagian ketuk *Periksa Unggahan* ditetapkan dalam persen adegan (31 §9); saat berkas data ditulis, kotak itu perlu dicek dengan teks bahasa Inggris juga, terutama E3, F3, F4, D4, dan C4. Pilihan tindakan Skenario Digital yang terpanjang (`wnb-5-b04` pilihan 2, `mgl-5-a02` pilihan 1) juga perlu dicek di mock-up.
9. **Tanggal dan hari** ("Sabtu, 12 Juli", "5 Mei") diterjemahkan biasa. Tidak ada butir yang menguji tanggal, kecuali `mgl-3-b02` (urutan tahun 907 dan 1957), yang angkanya tetap.

Cara memperbarui

- Pengembang memeriksa dokumen ini, menandai baris yang diubah, lalu menaikkan statusnya ke `disetujui pengembang` (dicatat di 04 dan `00`).
- Bila 08 berubah (perbaikan sebelum validasi, matriks revisi setelah validasi, atau uji keterbacaan), baris yang sama di sini diterjemahkan ulang oleh AI dan diperiksa lagi oleh pengembang. Butir yang berubah ditandai di tabelnya dengan tanggal dan asal perubahannya (`asal: peneliti + ahli` untuk hasil validasi).

- Butir yang baru diterjemahkan ulang mendapat lagi `review.note` "terjemahan belum diperiksa" di berkas data sampai pengembang memeriksanya.

Dipakai di mana

- **Gelombang kode D** (31 §7.3): kolom bahasa Inggris berkas data `docs/bank-soal/data/*.php` diisi dari dokumen ini, bukan dari teks Indonesia. Sampai pengembang menyetujui dokumen ini, butirnya tetap bercatatan `review.note` "terjemahan belum ada" (31 §6.4; keputusan no. 11), dan `gelita:content:verify --siap-penelitian` tetap menyebutnya.
- **Isi Rumpang**: pasangan kata di tabel kunci dan pengecoh menjadi pasangan bank kata (`wordBank()`), yang dipakai `ErrorCodeResolver` untuk siswa yang bermain dalam bahasa Inggris.
- **Narasi**: teks bahasa Inggris ini juga naskah rekaman `instruksi-*`, `unggahan-*`, dan `skenario-*` versi Inggris (12 → daftar rekaman), setelah disetujui.
- **Bukan untuk validasi.** Validator, uji keterbacaan, dan cek fakta memakai 08. Data penelitian dari siswa yang bermain dalam bahasa Inggris tetap tercatat dengan kode butir yang sama.
